They can pick you and your bike up or send you to anywhere by taxi or boat.

Remains of Amazaki Castle

Add: Amazaki, Kamiura

This is one of the oldest remains of a pirate castle in Japan. The 16th century was its golden age, and the Murakami Suigun(Pirates) lived here during the Sengoku Era. Later, it was repaired by Todo Takatora, the Lord of Imabari Castle in the early Edo Era. A part of the fixed stone wall remains. You can walk here only when the tide is the lowest. You can feel the history of those days.

Walking to the island would be a rare experience. Please try in the summer, when it is refreshing.
